

# TAINÁ ROCHA

I am a Brazilian researcher working on patterns of biodiversity distribution, focusing on the impacts of global change (climate change and land-use and land-cover change). My recent interests and work include: **1.** Analysis of climate data and land-use and land-cover data under different scenarios of climate change, **2.** Spatial analysis (GIS), **3.** Ecological niche models/ species distribution models and other niche analyses to assess the impacts of global change on biodiversity, **4.** R package development

**Note:** I use open-source tools and platforms. I am interested in good practices about open science (open databases, open software, etc.), good workflows, reproducibility and FAIR principles.

## EDUCATION

- 2017**  
|  
**2013**
  - **PhD in Zoology**  
Emílio Goeldi Museum  **MPEG**, Brazil
    - DISSERTATION: Phylogeographic of disjunct bird between Amazon and Atlantic Forest
- 2012**  
|  
**2010**
  - **MSc in Environmental biology**  
Federal University of Pará  **IECOS**, Brazil
    - THESIS: Phylogeographic analysis of *Xiphorhynchus guttatus* from Amazon and Atlantic Forest
- 2010**  
|  
**2006**
  - **Degree in biological science**  
Federal University of Pará  **UFPA**, Brazil

## RESEARCH EXPERIENCE

- Present**  
|  
**Nov-2021**
  - **Lab Guest**  
[Biogeography / Statistical Models / Informatics lab](#)  **Remote**, Florida-USA
- Mar-2022**  
|  
**Aug-2021**
  - **Biodiversity Researcher and Consultant at Brazilian National Centre for Flora Conservation**  
[IUCN Green Status](#) of threatened species of the Brazilian Cerrado  **JBRJ**, Brazil
    - The IUCN Green Status classifies species into nine Species Recovery Categories, indicating the extent to which species are depleted or recovered compared to their historical population levels. Each Green Status assessment measures the impact of past conservation on a species, a species' dependence on continuing support, how much a species stands to gain from conservation action within the next ten years, and the potential for it to recover over the next century.

## COMMITTEE MEMBER

- 2021 ● Leave out or put in - selecting input data to improve ecological niche models applied to conservation and climate change analysis: an approach using the Atlantic Goliath Grouper, *Epinephelus itajara* (Perciformes)  
**Final Master committee.** Student: Eduardo Motta Carelli Minsky. Advisor: Maria Lucia Lorini. Institution: UNIRIO  
📍 UNIRIO, Brazil
- 2021 ● Wallacean knowledge shortfall of mammals in the Central Corridor of the Atlantic Forest  
**Final undergraduate committee.** Student: Inês Motta Comarella. Advisor: Francisco Candido Cardoso Barreto. Institution: UFES  
📍 UFES, Brazil
- 2021 ● Impacts on the food behavior of birds in the urban, semi-urban and rural environment in the municipal of Capanema, Pará  
**Final undergraduate committee.** Student: Luana Gabriela Costa Bezerra. Advisor: Breno Barros. Institution: UFRA  
📍 UFRA, Brazil
- 2021 ● Modeling species distribution of plant species as tool for assessing the impacts of climate changes and progress of Sustainable Development Goals (SDGs) 13 and 15 in Caatinga biome  
**Master's qualifying examination.** Student: Lucas Peixoto Teixeira. Advisor: Marcelo Freire Moro. Institution: UFC  
📍 UFC, Brazil
- 2020 ● Strategies for conservation of endemic and threatened species: *Hindsia glabra* K.Schum & *Aosa uleana* (Urb.Gilg) Weigend  
**Master's project monitoring committee.** Student: Bárbara Piovani Luz Aieta Afonso. Supervisor: Marinez Ferreira de Siqueira. Institution: ENBT/JBRJ  
📍 ENBT-JBRJ, Brazil, Brazil
- 2018 ● Seabird habitat use and its association with foraging with Guiana dolphin (*Sotalia guianensis*) in Sepetiba Bay (2018).  
**Undergraduate monitoring committee.** Student: Leonardo Gomes Pacheco de Sá. Advisor: Maria Alice dos Santos Alves. Co-advisor: Rodrigo Hipolito Tardin Oliveira. Institution: UFRJ  
📍 UFRJ, Brazil

## SELECTED TALKS & SCIENTIFIC COMMUNICATION

- 2020 ● Open tools and databases to analyze biodiversity in space and time  
Week curator at [Biodiversity in Focus](#) | [Webpage](#) for the content shared  
📍 Online
- 2020 ● Global land-use and land-cover data: historical, current and future scenarios  
Final presentation in [OLS-2](#) | [Slides](#)  
📍 Online
- 2019 ● Connecting data and experiences: Biodiversity, Information and Communication Technologies in Brazil  
[RNP 2019](#) | [Slides](#)  
📍 Brasília, Brazil

## SELECTED EVENTS

- 2021 ● V International Seminar on Statistics with R  
[V SER](#) event was recognized by the R Foundation (2018) for its pioneering in Latin America in bringing together an expressive number of R users| Participation as a listener.  
📍 Online
- 2019 ● Forum of Rede Nacional de Ensino e Pesquisa  
[RNP 2019](#). Challenges of digital transformation in teaching and research will lead debates at 2019 RNP Forum| Participation as Guest speaker.  
📍 Brasília, Brazil

I recently created a website<sup>7</sup> where I will talk about science communication, provide tutorials of different tools and diverse content about science.

2018

### ● Workshop Evolutionary Rescue

The [workshop](#) was organized by [José Alexandre Diniz-Filho](#) professor. The general concept of “evolutionary rescue” refers to the possibility of rapid Darwinian adaptation of populations under a strong effect of environmental stress. Specifically, in this workshop we discussed: 1) the concept of evolutionary rescue and the theoretical models in evolutionary genetics that have been used to study this process, and; 2) the integration of these theoretical models with ecological niche modelling techniques, in a context of climate change and anthropogenic changes in the landscape, 3) their implications for the conservation of diversity in the face of these changes, at different spatial scales. Analyses were implemented for some species of amphibians, such as model organisms, and the possibilities of expanding these analyses to a global scale were discussed, and several sub-projects to be carried out in the coming years on this topic were defined. 20h

📍 Goiânia, Brazil

## COMPLEMENTARY TRAINING COURSES

Nov  
2021-  
Jan  
2022

### ● R for Data Science II

🔗 This course aims to deepen the essential concepts of programming in R for Data Science. We will present intermediate and advanced data manipulation techniques from real data analysis problems, including texts and dates, and functional programming concepts. 18 h

📍 Online

Mar 2021

### ● Flexdashboard: Interactive panels using R

🔗 Analyze. Share. Reproduce. Your data tells a story. Use rmarkdown and Flexdashboard and transform your analysis into high-quality documents, reports, presentations and dashboards. 4 h

📍 Online

Feb 2021

### ● Managing tables with dplyr R package

🔗 The main functions of dplyr for handling tables. 4 h

📍 Online

Feb 2021

### ● Regular expressions (regex) for data cleaning

🔗 Regex as part of the data cleaning and transformation process using Tidyverse R packages. 4 h

📍 Online

Aug  
2020  
|  
Dec  
2020

### ● Open Life Science program

[OLS-2](#). Training for early stage researchers and young leaders interested in furthering their Open Science skills.

📍 Online

Sep  
2020

● Writing academic manuscripts using markdown

🔗 This training provided the different steps and tools for writing academic manuscripts or technical reports in an automated and reproducible way using R and markdown. 4 h

📍 Online
