TAINÁ ROCHA

I am a Brazilian researcher working on patterns of biodiversity distribution, focusing on the impacts of global change (climate change and land-use and land-cover change). My recent interests and work include: **1.** Analysis of climate data and land-use and land-cover data under different scenarios of climate change, **2.** Biodiversity, **3.** Spatial analysis (GIS), **4.** Bioinformatics, R programming language, Google Earth Engine etc.
Note: I use open-source tools and platforms. I am interested in good practices about open science (open databases, open software, etc.), good workflows, reproducibility and FAIR principles.

EDUCATION

2017 | 2013

PhD in Zoology
Emílio Goeldi Museum ⚲ MPEG, Brazil

· DISSERTATION: Phylogeographic of disjunct bird between Amazon and Atlantic Forest

2012 | 2010

MSc in Environmental biology
Federal University of Pará ⚲ IECOS, Brazil

· THESIS: Phylogeographic analysis of *Xiphorhynchus guttatus* from Amazon and Atlantic Forest

2010 | 2006

Degree in biological science
Federal University of Pará ⚲ UFPA, Brazil

RESEARCH EXPERIENCE

Present | May-2022

Postdoctoral Researcher at Federal University of Minas Gerais
Federal University of Minas Gerais ⚲ UFMG

· Impacts of global changes on Brazilian biodiversity and ecosystem services

Present | Nov-2021

Lab Guest
Biogeography / Statistical Models / Informatics lab
⚲ Remote, Florida-USA

 Website

Mar-2022 | Aug-2021

Biodiversity Researcher and Consultant at Brazilian National Centre for Flora Conservation

IUCN Green Status of threatened species of the Brazilian Cerrado

📍 JBRJ, Brazil

· The IUCN Green Status classifies species into nine Species Recovery Categories, indicating the extent to which species are depleted or recovered compared to their historical population levels. Each Green Status assessment measures the impact of past conservation on a species, a species' dependence on continuing support, how much a species stands to gain from conservation action within the next ten years, and the potential for it to recover over the next century.

Sep-2021 | Jun-2021

Volunteer Researcher at United Nations Volunteers

UN Online Volunteers

📍 United Nations

· Research Support for an Automated Analysis of Sustainable Development Goals
G https://www.osdg.ai/
2021 | 2019

Postdoctoral Researcher at Botanical Garden of Rio de Janeiro

Terrestrial Ecosystem Modeling

📍 JBRJ, Brazil

Supervisor: Marinez F Siqueira

· Beta diversity in Caatinga dry tropical forest
 https://github.com/Tai-Rocha/Caatinga_Dry_Forest.github.io
· Climatic niche analysis of *Syzygiella rubricaulis* (Bryophytes)
 https://github.com/Tai-Rocha/S_rubricaulis_bryophytes
· The first botanical explorations of bryophyte diversity in the Brazilian Amazon mountains: high species diversity, low endemism, and low similarity
 https://github.com/Tai-Rocha/Bryophyte-Amazon-mountains
· Ecological niche models with future projections of Dimorphandra wilsonii Rizzini (Fabaceae) presented to Green List in the three-year activity plan of the Brazilian Plant Red List Authority member of the Plant Conservation Commitee between 2017-2020 and the Species Survival Commission of the International Union for Conservation of Nature (IUCN)
 https://github.com/Tai-Rocha/faveiro
· Ferns and lycophytes diversity of Tijuca forest.
 https://github.com/Tai-Rocha/Ferns-and-lycophytes

2019 | 2017

Researcher of Technological Development and Innovation

INCT Ecology, Evolution and Biodiversity Conservation

📍 UFRJ, Brazil

Supervisor: Mariana M Vale

· Global land-use and land-cover (LULC) data under historical, current, and future climatic conditions
 https://github.com/Tai-Rocha/LUH2_Data
· Ecological niche models (ENMs) for *Carpornis melanocephala* (Passeriformes: Cotingidae) in Rio de Janeiro State,Brazil

👥 COMMITTEE MEMBER

Apr 2022

Modeling species distribution of plant species as tool for assessing the impacts of climate changes andprogress of Sustainable Development Goals (SDGs) 13 and 15 in Brazilian semi-arid biome

Final Master committee. Student: Lucas Peixoto Teixeira Advisor: Marcelo FreireMoro

📍 UFC, Brazil

Jun 2021

Leave out or put in - selecting input data to improve ecological niche models applied to conservation and climate change analysis: an approach using the Atlantic Goliath Grouper, Epinephelus itajara (Perciformes)

Final Master committee. Student: Eduardo Motta Carelli Minsky. Advisor: Maria Lucia Lorini. Institution: UNIRIO

📍 UNIRIO, Brazil

Jul 2021

Wallacean knowledge shortfall of mammals inthe Central Corridor of the Atlantic Forest

Final undergraduate committee. Student: Inês Motta Comarella. Advisor: Francisco Candido Cardoso Barreto. Institution: UFES

📍 UFES, Brazil

Mar 2021

Impacts on the food behavior of birds in the urban, semi-urban and rural environment in the municipal of Capanema, Pará

Final undergraduate committee. Student: Luana Gabriela Costa Bezerra. Advisor: Breno Barros. Institution: UFRA

📍 UFRA, Brazil

Feb 2021

Modeling species distribution of plant species as tool for assessing the impacts of climate changes andprogress of Sustainable Development Goals (SDGs) 13 and 15 in Caatinga biome

Master's qualifying examination. Student: Lucas Peixoto Teixeira. Advisor: Marcelo Freire Moro. Institution: UFC

📍 UFC, Brazil

Aug 2020

Strategies for conservationof endemic and threatened species: Hindsia glabra K.Schum E Aosa uleana (Urb.Gilg) Weigend

Master's project monitoring committee. Student: Bárbara Piovani Luz Aieta Afonso. Supervisor: Marinez Ferreira de Siqueira. Institution: ENBT/JBRJ

📍 ENBT-JBRJ, Brazil

Jul 2018

Seabird habitat use and its association of foraging with Guiana dolphin (Sotalia guianensis) in Sepetiba Bay (2018).

Undergraduate monitoring committee. Student:Leonardo Gomes Pacheco de Sá. Advisor: Maria Alice dos Santos Alves. Co-advisor: Rodrigo Hipolito Tardin Oliveira. Institution: UFRJ

📍 UFRJ, Brazil

🖥 TEACHING EXPERIENCE

Sep-2021 | Sep-2021

Guest lecture.

Plant Biology Postgraduate 📍 UFPE, Brazil

· Ecological Niche Models: Introduction to Theory and Practice (60 h) | **G** https://classroom.google.com/u/0/r/Mzg4ODE4NDg1NDQx/sort-first-name

2020 | 2019

Instructor

Biology department 📍 PUC-Rio, Brazil

· Ecological Niche Models and Species Distribution Models, theory and practice (40 h)
· Public tools for spatial analysis of biodiversity (40 h)

2020 | 2020

Instructor

ENBT Postgraduate 📍 ENBT-JBRJ, Brazil

· Ecological niche modeling: theory and practice. Modeling potential species distribution. Niche concept and its application. Algorithms modeling. Source of biotic and abiotic data. Maps and spatial analysis using GIS. Tools for processing and preparing biotic and abiotic data. R programming to modeling. Applications. Model testing and validation (40 h) | **G** https://classroom.google.com/u/0/r/MTI2NTU0NzQ0Nzcw/sort-last-name

2020 | 2020

Guest Lecture

II National Meeting on Biological Collections and their Interfaces

📍 IVB, Brazil

· Ecological niche models and biological conservation in future scenarios of global changes (5 h)

2019 | 2018

Guest lecture.

Biological Sciences- Bachelor's Degree 📍 UVA, Brazil

· Ecological niche models under a biogeography perspective (3 h)
· Ecological Niche Models and Species Distribution Models (3 h)

2018 | 2017 ● Guest lecture

Biological Sciences- Bachelor's Degree ● UFRA, Brazil

· Introduction to Geographic Information System (GIS) (12 h)
· Data for ecological niche models (12 h)

2017 | 2017 ● Guest lecture

Biological Sciences Undergraduate ● UNESA, Brazil

· Introduction to databases which provide input to perform ecological niche models (3 h)

2017 | 2015 ● High school teacher

Dinâmica Natural ● Rio de Janeiro, Brazil

· Science classes

👥 MENTORING EXPERIENCE

2019 ● Technical Advisor

Geographic Information System (GIS). Student: Tainá Cunha Udine Bernardino. Institution: Federal University of Rio de Janeiro, Brazil.

Geographic Information System (GIS). Student: João Pedro Sousa Cerqueira Cruz. Institution: Federal University of Rio de Janeiro

● RJ, Brazil

📢 SELECTED TALKS & SCIENTIFIC COMMUNICATION

2020 ● Open tools and databases to analyze biodiversity in space and time

Week curator at Biodiversity in Focus | Webpage for the content shared

● Online

2020 ● Global land-use and land-cover data: historical, current and future scenarios

Final presentation in OLS-2|Slides

● Online

2019 ● Connecting data and experiences: Biodiversity, Information and Communication Technologies in Brazil

RNP 2019 | Slides

● Brasília, Brazil

☑ SELECTED EVENTS

2021 ● V International Seminar on Statistics with R

V SER event was recognized by the R Foundation (2018) for its pioneering in Latin America in bringing together an expressive number of R users| Participation as a listener.

● Online

I recently created a website[7] where I will talk about science communication, provide tutorials of different tools and diverse content about science.

2019 — Forum of Rede Nacional de Ensino e Pesquisa

RNP 2019. Challenges of digital transformation in teaching and research will lead debates at 2019 RNP Forum| Participation as Guest speaker.

📍 Brasília, Brazil

2018 — Workshop Evolutionary Rescue

The workshop was organized by José Alexandre Diniz-Filho professor. The general concept of "evolutionary rescue" refers to the possibility of rapid Darwinian adaptation of populations under a strong effect of environmental stress. Specifically, in this workshop we discussed: 1) the concept of evolutionary rescue and the theoretical models in evolutionary genetics that have been used to study this process, and; 2) the integration of these theoretical models with ecological niche modelling techniques, in a context of climate change and anthropogenic changes in the landscape, 3) their implications for the conservation of diversity in the face of these changes, at different spatial scales. Analyses were implemented for some species of amphibians, such as model organisms, and the possibilities of expanding these analyses to a global scale were discussed, and several sub-projects to be carried out in the coming years on this topic were defined. 20h

📍 Goiânia, Brazil

📖 COMPLEMENTARY TRAINING COURSES

Nov 2021- Jan 2022 — R for Data Science II

ⓜ This course aims to deepen the essential concepts of programming in R for Data Science. Advanced data manipulation techniques from real data analysis problems, including texts and dates, and functional programming concepts. 18 h

📍 Online

Mar 2021 — Flexdashboard: Interactive panels using R

ⓜ Analyze. Share. Reproduce. Your data tells a story. Use rmarkdown and Flexdashboard and transform your analysis into high-quality documents, reports, presentations and dashboards. 4 h

📍 Online

Feb 2021 — Managing tables with dplyr R package

ⓜ The main functions of dplyr for handling tables. 4 h

📍 Online

Feb 2021 — Regular expressions (regex) for data cleaning

ⓜ Regex as part of the data cleaning and transformation process using Tidyverse R packages. 4 h

📍 Online

Aug 2020 | Dec 2020

● **Open Life Science program**

OLS-2. Training for early stage researchers and young leaders interested in furthering their Open Science skills.

📍 Online

Sep 2020

● **Writing academic manuscripts using rmarkdown**

🅜 This training provided the different steps and tools for writing academic manuscripts or technical reports in an automated and reproducible way using R and rmarkdown. 4 h

📍 Online

This CV was made with R packages: **pagedown** e datadrivencv.
